EDUCATION

University of Southern Mississippi

Bachelor of Science in Computer Science, Minor in Economic Data Analysis

GPA: 4.0/4.0

Hattiesburg, MS

Aug. 2023 – May 2027

Cornell University

Summer Class in Machine Learning Foundations

Remote

May 2025 – Aug. 2025

EXPERIENCE

Artificial Intelligence Intern

June 2026 – Aug. 2026

Gift of Life Marrow Registry

Boca Raton, FL

- Took a full-stack training tool from prototype to production, now used by 450+ campus ambassadors
- Trained Machine Learning models to predict stem cell collection times and cancellation probabilities
- Built AI tools for multiple departments and presented them to non-technical leadership, including the CEO

Artificial Intelligence & Machine Learning Fellow

May 2025 – May 2026

Break Through Tech

Remote

- Selected from 3,000+ applicants for the Break Through Tech AI program at Cornell Tech
- Built preprocessing and modeling pipelines in Python to forecast Aerospace employment across 50 states
- Completed 12 months of Python and ML coursework with Cornell faculty and mentorship from industry experts

Software Engineering Intern

Oct. 2025 – Dec. 2025

Lumibot LLC

Hattiesburg, MS

- Debugged frontend-backend integration issues across the Illumibot Flutter app and React/Node.js website
- Built internal tooling that converts bug reports and feature requests into GitHub issues triaged by urgency
- Contributed 50K+ lines of code to an established production codebase using Git-based workflows

Software & Data Science Intern

May 2025 – July 2025

Delta Health Alliance

Greenwood, MS

- Developed a full-stack Learning Management platform (React/TypeScript, Node.js API, SQL) on AWS for 25+ users
- Designed and taught a full Python curriculum to 40+ high school students in rural Mississippi

PROJECTS

DCS | TypeScript, Express, PostgreSQL, Anthropic API, ElevenLabs API

June 2026 – July 2026

- Abstracted voice and LLM grading services behind interfaces so providers swap in through config flags
- Built an Express API that receives post-call webhooks and runs asynchronous, idempotent LLM grading
- Drove the full lifecycle from proposal to deployment, gathering feature feedback from server administrators

HIPAApotamus | Next.js, OpenAI, AWS

Feb. 2026 – May 2026

- Won Hatchathon 2025 with a HIPAA-compliant system that automates clinic-vendor contract management
- Implemented GitHub OAuth to securely pull data from users' repositories
- Contacted by MS Dept. of ITS after the hackathon for a joint project with MS Dept. of Health and AWS

RESEARCH & PUBLICATIONS

Metrics Failure in LLM-Based Code Vulnerability Repair: An Empirical Study and a Change-Aware Screen

O. Nepal, S. Aryal, O. Olukola, N. Rahimi. *arXiv preprint arXiv:2609.26749 (cs.SE)*, Sept. 2026

TECHNICAL SKILLS

Languages: Python, Java, C/C++, SQL (Postgres), TypeScript, JavaScript, HTML/CSS, R

Frameworks: FastAPI, Flask, React, Next.js, Node.js, Express, JUnit, Material-UI

Developer Tools: Git, Docker, Linux, TravisCI, AWS, Google Cloud Platform, Vercel, VS Code, Claude Code

Libraries: pandas, NumPy, Matplotlib
